**Challenges**

**Taking risks**

# GO WILD

**Mental health and well-being**

**Appreciating nature**

**Having their own time and space**

Sometimes we think children need **'more' to do** and more **physical resources**

but...children are often happiest and flourish when they have time and space to explore. When children have less, they start to **'think outside the box'** and be more creative with their ideas and resources available.
